PROFILE

First-year T Level Digital Software Development student focused on applied AI and creative technology. Built and released a mobile app for iOS and Android, developed web and examination systems, and tested AI-assisted logistics automation. I use AI in planning, prototyping, development and testing to turn ideas into working products.

TECHNICAL SKILLS

APPLIED AI & AUTOMATION AI-assisted development, AI model/API integration, n8n workflows, screenshot data extraction, prompt design

SOFTWARE & TOOLS Python, React Native / Expo, Supabase, PostgreSQL, GitHub, Vercel, web development

CREATIVE & DELIVERY Generative AI video and image creation, UI/UX design, prototyping, testing, SEO, ASO

SELECTED PROJECTS

TrendRadar | Founder & Developer — 2026 - present

- Designed and released a trend-intelligence app on iOS and Android, featuring search, saved trends, momentum indicators and AI-generated explanations.
- Worked on the interface, backend integration, testing, release preparation and app store optimisation.

ProClass | Website & Portal Developer — 2026 - present

- Built a live certification website and developed a role-based examination portal currently in user acceptance testing (UAT).
- Worked on candidate and administrator workflows, authentication, database-backed systems and testing.

Raza Enterprises LTD | Website & Automation Project — 2026

- Built the courier business website and tested AI-assisted extraction of job details from screenshots into Google Sheets, including duplicate checks.

The Last Signal | Python College Project — 2026 - present

- Developing a text-based game using Python, pseudocode, flowcharts, user input and branching choices.

WORK EXPERIENCE

Raza Enterprises LTD | Data Management & Social Media Manager — Mar 2025 - Mar 2026

- Managed data, reporting and social media workflows; used performance insights to support digital activity.

UMMI Textile LTD | Advertising Campaign Project — May - Sep 2023

- Supported campaign planning, audience targeting, budget allocation and performance analysis.
